TP pattern design

Exercise 1:

Exercise 2:

```
33      public static void main1(int n) {  no usages
34          ProgramInterface p;
35
36          if (n==1) {
37              p = new Program1();
38          } else if (n==2) {
39              p = new Program2();
40          } else if (n==3) {
41              p = new Program3();
42          } else {
43              throw new IllegalArgumentException("Invalid program number");
44          }
45
46          System.out.println("I am main1");
47          p.go();
48      }
```
